**MUNICIPAL DISTRICT
OF CROWN NO. 399**

Lacombe, Alberta,
February 15, 1935

The Council of the above district met in the Municipal Office, there being present: Councillors Armstrong, Huppelbauer, Parker, Hand, Hall and Stewart.

The minutes of the previous meeting were read, and it was moved by Parker that they be adopted as read. Parker: That Mr. Hornby be paid the sum of Fifteen Dollars (\$15.00) for use of road through N.E. 30-40-26-4.

Armstrong: That the McQuillan place be rented to L. Calkin, and T. Alexander for one year for Twenty dollars (\$20.00).

Stewart: That this council accept R. A. Burton's tender for W 1-2 of 9-41-27-4.

Huppelbauer: That the Secretary be instructed to include in the forthcoming Tax Sale all those lands under the 1933 Tax Consolidation Act, which have defaulted in payment.

Parker: That this council approve of Twenty-five dollars (\$25.00) per month Mother's Allowance to Mrs. Johnstone.

The Secretary was instructed to notify S. G. Cadman by registered mail that his lease expires on March 15th and that as the land had been sold, he would govern himself accordingly.

The following correspondence was read, and dealt with: Sted Grain letter—Wm. Hewitt.

Sylvan Lake letter—mayor. McCormick letter re Mrs. Dorsey and Mrs. Johnstone.

C.P.R. re N.W. 35-41-26-4. Huppelbauer: That Wm. Parker be paid the sum of Fifty dollars (\$50.00) for time in investigating relief, for the season ending May 1st, 1935.

Armstrong: That the following accounts be passed and paid: Alta. Mun. Stationers 36.63

**Keep GOING with
BETTER
BRAN
FLAKES**

Genuine Bran Flakes to nourish active bodies

Kellogg's PEP Bran Flakes are the favorite of energetic people. They taste good—the fine, full flavor of toasted wheat. The nourishment and food for busy muscles. The protein. The vitamin B. Plus enough extra bran to be mildly laxative.

PEP Bran Flakes are truly better bran flakes. Better for flavor. For crispness. For nourishment and gentle laxative effect.

Insist on PEP Bran Flakes. Sold by all grocers. Always oven-fresh and ready to eat with milk or cream. Extra delicious with sliced fruit or honey added. Enjoy these better bran flakes often. Breakfast. Lunch. Supper. Wonderful for a between-meal or bedtime snack. Popular with the whole family. Made by Kellogg in London, Ontario.

Kellogg's PEP Bran Flakes

**Anniversary
1885 Riel
Rebellion**

Preparations are under way throughout the Dominion to celebrate the 50th anniversary of the Riel Rebellion of 1885.

The writer, who was a member of the Winnipeg contingent and spent seven months in the field, will endeavor to give a short history of the rebellion and the causes which led to it.

The 1885 rebellion was in many ways very similar to the first Riel rebellion which broke out in Manitoba in 1870. In that year, great dissatisfaction among the half-breeds, what they termed "the treatment at the hands of the Dominion Government in not recognizing their rights to lands on which they squatted, led to an uprising in which Louis Riel and his lieutenants overthrew the Government and set up a Government of their own choosing.

Louis Riel was the head of the new government, and held power until troops under General Wootley arrived at Fort Garry and re-established stable government in 1871.

Louis Riel then fled the country and took up his residence in Montana, where he resided until 1884. This uprising led to the settlement of the half-breed grievances in Manitoba.

A similar state of affairs in Saskatchewan developed in 1884. The half-breeds were unable to come to any arrangement with the government of the day, and as a last resort set up a deputation composed of Gabriel Dumont, James Isbester, M. Ouellette and M. Dumas to Montana to seek the assistance of Louis Riel.

Riel was agreeable, and in July 1884 arrived. He established a provisional government with Batouche as headquarters and set up a government, which comprised the following members: President, Louis Riel; Adjutant General, Gabriel Dumont; Secretary, Philippe Gagnon; Secretary to President, Honore Jaxon; Attorney-General, Maxime Lepine; Treasurer and Assistant Adjutant-General, Albert Monahan; Councilor, Norbert Delorme, Charles Nolin, Alex Cadien, P. Tourand, J. Parenteau, M. Dumas, J. Belanger, Philp Guardupuy, J. Caron and others.

A bill of rights was drawn up under Riel's orders, and forwarded to the Dominion Government. The provisions of the bill were:

1.—The sub-division of the north-west territories into provinces.

2.—The half-breeds to receive the same grants and other advantages as the Manitoba half-breeds.

3.—Patents to be issued at once to the colonists in possession.

4.—The sale of half a million acres of Dominion lands, the proceeds to be applied to the establishment of half-breed settlements of schools, hospitals and such institutions and the equipment of the poorer half-breeds with seed grain, implements, etc.

5.—The reservation of a hundred townships of swamp land for the distribution among the children of half-breeds during 120 years.

6.—A grant of at least \$1,000 for the maintenance of an institution to be conducted by the nuns in each half-breed settlement.

7.—Better provision for the support of the Indians.

While awaiting a reply from Ottawa, Louis Riel started a speaking campaign through the country, and succeeded in inflaming the Indians and half-breeds to such an extent that the lives of white settlers were endangered, and marauding bands went through the country stealing whatever they could get in the way of cattle, horses, provisions, etc.

Then word came from a gentleman who had been in Ottawa that the government had decided to answer their petition with bullets and that already troops were on the way to take Riel and his party captives.

This was a foolish statement and had the effect of the calling together of the council, and the determination of the half-breeds to defend their leaders to the end was expressed.

The half-breeds and Indians immediately began to acquire fire-arms by raids on the white settlers and trading posts; they burned settlers' homes, drove off their cattle, and got ready to defend what they considered their rights.

In March, 1885 the rebellion got under way and depredations continued. All telephone lines were cut and the territory surrounding Batouche was cut off from communication with the outside world. Officials in the various H.B. and other trading posts were taken prisoner, and the stores looted.

The government at last realized that there was trouble in the territories, and on March 23, Sir John A. Macdonald rose in his place in the House of Commons and announced that "open rebellion was in existence against the Queen's authority."

THURSDAY, MARCH 23, 1935.

**Horse Sale
Breaks Record**

One of the most successful horse sales in recent years was held in Lacombe on March 19th, by the Lacombe farmers, between 10:30 and 7 p.m. when 302 horses were put through the ring, by Clarence F. Dameron.

Besides these, 34 head were bought privately at the sale by Bodoff and Vic Bowes and 12 head were sold just previous to the sale by Rex Ireland, the latter being shipped in for the sale, but Mr. Ireland receiving a bid for them which he could not resist taking, he let them go to Alex Watson, who is shipping them to Montreal.

A 272 head of broken horses through the sale brought an average of \$69.95.

88 head of halter broken (only) animals brought an average of \$49.00 per head.

2 Shetland Ponies, bringing \$27.50 and \$25.00 respectively.

The top for a single horse was \$155.00 bought by McKenzie Bros; other single horses brought \$135.00, \$132.50 and a good number \$125.00 and thereabouts.

A couple of teams brought \$250.00 each, these being contributed by O. S. Young of Lacombe and Thos. Long of Blackfalds and purchased by Vic Bowes and M. Lang.

Altogether there were 15 carloads of horses shipped out by the following buyers; consigned to Montreal, Quebec, Toronto, and the East: Alex Watson, 3 carloads; Isidore Bodoff, 3 carloads; Vic Bowes, 1 car; Thos. Burton, 1 car; J. McNeil, 1 car; C. Dunlop, 1 car; E. M. Bernier, 1 car; McKenzie Bros, 1 car; Forcier and Shea, 1 car; McKenzie and Larsen, 1 car and Negel and Ameline, 1 car.

A good number of the local farmers also were in the bidding, particularly for the younger animals for which there is a good demand. This sale will put a lot of cash into the farmer's pockets around, but as has always been pointed out by the promoters of this annual sale event the farmers must put the cash on their horses and fit them up for the Eastern markets if they expect to get the high prices. This was not done this time owing to the shortage of feed prevailing in the district.

NOTICE
A General Meeting of the shareholders of The Lacombe Fair Grounds Company Ltd. will be held in the Church Hall on Saturday, April 6, 1935 at the hour of 3 p.m. to consider the erection of a new sales pavilion and the repairs to existing buildings.

All Shareholders Are Urgently Requested to Attend
D. F. CHISHOLM,
Secretary-Treasurer
Lacombe, Alta., March 27, 1935.

It looks now like an advance in prices will come by summer on beds, springs and mattresses. Better see us soon as our stock is large and prices will remain the same as usual, while stock lasts. Lacombe Furniture Store.

I have got up my supply of ice for the season, and will deliver on request. Phone 72. A. Dwan.

New Linoleum in 12 ft. width and a lot of nice Linoleum and Colgong rugs in all sizes. All 1st quality, no second and at the lowest prices at Lacombe Furniture Store.

POULTRY MARKET PLAN
Possibility of a second attempt being made to have the marketing of poultry products brought under the provisions of the Federal Marketing Board was seen in the visit of W. A. Landreth, president and general manager of the Canadian Poultry Pool, at Edmonton.

Mr. Landreth, who makes his headquarters in Winnipeg, stated Monday he was passing through to British Columbia on business. His visit coincided with the sittings of the Alberta Poultry Marketing Board at which he was present.

Mr. Landreth, who will be made to the federal board is certain, and it is equally certain that the province of British Columbia will be included in the set up of the scheme, which it is understood, will be presented within the next few weeks.

It will also be urged on federal authorities that when the new scheme is presented it will not be necessary to take a vote in either Saskatchewan or Alberta, these provinces having endorsed the principle through the plebiscite recently taken.

SOCIAL CREDIT GROUPS
Social Credit Group No. 1 held their regular meeting in the Town Hall, Monday evening, March 25th. The main business of the evening was the election of delegates for convention. The following were elected: Mr. T. Roberts, Mr. Frost and Mr. Chesser. The next meeting will be Monday evening, April 1st. All welcome.

The Lacombe Social Credit Women's Study Group, met at the home of Mrs. Dunphy on Thursday afternoon, March 21st. A good attendance was recorded and the visitors were most welcome. Following the general programme there was the election of delegates for the convention. The delegates elected were: Mrs. T. Roberts, Mrs. R. Watson, Mrs. J. Shearer. The next meeting will be held at the home of Mrs. J. Valene on Thursday evening, April 18th. New members and visitors welcomed.

**WILL CELEBRATE SIXTIETH
WEDDING ANNIVERSARY**

Mr. and Mrs. J. Jackson, parents of our genial C.P.R. Agent, Thos. Jackson, will celebrate the sixtieth anniversary of their marriage on Friday, 29th inst. In the evening of that day a reception in their home will be held at the residence of Mr. and Mrs. Thos. Jackson, from 7:30 till 10 o'clock, when the esteemed guests of honor will receive their friends. Mr. and Mrs. Jackson returned last week from an extended visit to the coast cities, and despite their age enjoyed themselves greatly, and were benefited by their holiday. The many friends in Lacombe wish Mr. and Mrs. Jackson many more happy anniversaries.

HEALTH INSURANCE

It will be of interest to all residents of Lacombe and vicinity to know that Dr. A. C. McGugan, secretary of the State Health Insurance Commission, will give an address in the Church Hall, Friday evening, March 29th on the subject: "The Legislative Commission's proposals for a Health Insurance Scheme for Alberta." There will be no admission charge and the address will commence at 8 p.m.

State Health Insurance is a subject of vital interest to every resident of Alberta and to have the scheme outlined by our eminent speaker as Dr. McGugan is a privilege of which everyone should take advantage. Remember the date, Friday, March 29 at 8 p.m.

BAPTIST CHURCH

Evangelist S. J. Waterman will preach again Sunday evening at 7:30. Sunday School at 11. Juniors at 6:15. BYPL Monday at 8 p.m.

The regular meeting of the W.I. will be held on Friday, April 5th, at the home of Mrs. J. Craigie. Mrs. Helena S. O'ndring constituency convener is expected to be present. You are invited to attend. Committee, Mrs. Irene Jenkins, Match, Watson and Redie.

THE TENDERFOOT

By
GEORGE R. RODNEY
Author of "The Coronado Trail,"
"The Canyon Trail," Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

Dad Kane, desert rat and luckless prospector till now returns to tell Dustin and Spike Goddard, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore.

Dustin unexpectedly comes along while Stone and Kane are riding fence and seeing them, stops and talks to Edith. He mentions their dispute could be settled by marrying him, and Edith refuses his proposal with remarks that make Dustin furious. He insults Stone, who promptly throws him into a pool of water.

Stone tells Crewe, his foreman, about his meeting with Dustin, Stone and Crewe go to Seco to send a telegram to Gerald Keene. While at Seco an attempt is made to kill Stone, who proves more than a match for his enemies.

Dustin learns that Gerald Keene has been sent for, and also that Duro Stone has seen the Broken Spur men rustling Carr's cattle. He sets out with Dad Kane to learn the location of his gold discovery. Dad Kane shows Dustin the mine.

They go back to camp, and Dustin shoots Kane. He fixes the shooting on Peyotí Gregg, a drug addict, who, stupefied by the narcotic he had taken, did not know whether he was guilty or not. They bury Kane and then return to the Broken Spur ranch.

Meanwhile at the Hour Glass, Carr, Crewe and Stone speculate as to the meaning of Dustin's return to the ranch, and as to the location of the mine. Carr, who is the proprietor's notebook, says that Stone thinks of a possible solution, and, accompanied by Edith Carr, rides out to Red Water to test out his theory, which proves correct, and they find the rich gold deposit mentioned in the proprietor's notebook. As they return to the ranch, they meet Dustin leaving the house, who, purposely, but unsuccessfully tries to ride down Stone.

(Now Go On With The Story)

CHAPTER XIII.—Continued

"Wait a bit. I've got a better plan than that..." Dustin's grin was the grin of a dog who sees the meat that he intends to seize. "Wait! If I had sprung that on Joe Carr, he'd simply wait till this Gerald Keene, his partner, turns up. Young Keene might have the money. If he has, then old Carr would get out of my clutches. See? Keene would sure help Carr meet that note. He'd sure do it if he ever learns of what we found in that mine and prospect of old man Kane's. I told Carr that if he'll get Edith to agree to marry me, I'll call off the suit about Soda Springs. He can't finance that suit anyway. See?"

"I see; you've given your hand away when there was no need to," said Goddard testily.

"Huh. Suppose I've got four good aces in the hole. What then?"

"Show me your aces," growled Spike. "Damned if I can see any sign of an ace in this mess."

"All right. I'll show you. Do you happen to remember the date that young imp of hell, Gerald Keene, the owner of the other half of the Hour Glass, is due here?"

"On the tenth of next month, he said. This is the next month and to-

day's the ninth. He's due in Seco tomorrow night, I reckon."

"All right. Now listen to me..." Dustin sat forward and tilted his chair on its front legs. "You and I've been partners for a good many years. That right?"

Spike Goddard stared at him. Was his partner losing his mind? He studied Dustin for a long three minutes and Dustin grinned quietly at him. Finally:

"We've been strip-pin' the Hour Glass of everything it got for more'n five years," said Spike. "If one of us told what he knows about the old, he'd sure as hell go to jail, I reckon. We've soaked away every dollar we could raise. We've got seventeen thousand in cold cash right now in our office safe. You don't need to have me say it but... Make your game. I'm playin' her as she lays."

Dustin nodded complete satisfaction.

"I knew you'd say that," he said. "Now listen. I've got Kane located that mine. It's on the Hour Glass, I know that. Kane and Peyotí and I went there. Kane showed me the mine. Then he and Peyotí got into a fight over some water. I wasn't in camp when it happened but I got back to find Kane dead with his head all mashed in and Peyotí in one of his confounded fits after diplo' all up with his stuff."

"That you give him..." said Spike, grinning.

Dustin's face turned the color of old dough. He leaned forward and gripped Spike's arm.

"If you weren't my partner, I'd kill you for that word," he said. Spike shrugged. He felt suddenly as though his veins had been filled with ice water.

"Go on," he said awkwardly.

"Aye. Well, when Peyotí saw what he'd done, he went all to pieces. Old Kane is buried up Red Water canon. No one will ever find him there. Well..." This man Gerald Keene is Gerald Kane. He's the nephew of old Kane. The name, d'ye see? Gerald Kane is comin' out here to investigate the reported death of his uncle, Dad Kane."

"If the murderer is discovered Peyotí Gregg will hang..." Is it gettin' clear to you?"

"Good God," said Spike explosively. "Do you expect me to believe that..."

"I don't care a damn if you believe it or not so long as Peyotí believes it. Get me so far?"

"I sure do," Spike glanced admiringly at his partner. This would be a master stroke indeed. If Peyotí Gregg, the well-known "hop-head" could be got to kill Gerald Keene then Keene's share of the Hour Glass would pass to old Joe Carr, and they held old Joe Carr's note for the Hour Glass..." where Kane and Dustin had located the gold.

"By God," he said, "you've hit it. But I swear I don't see how you can pull it off."

"You don't have to see. Go on out of here and tell Peyotí that I want to see him at once. Not a word more than that."

Spike went and ten minutes later Peyotí dropped his hat at the door and came shambling into the room.

Dustin looked up from some pretend work at the desk.

"It's a good thing for you, Peyotí, that you came at once," he said. "I'm sorry for you, but I don't see how I can help you..." Remember old Dad Kane, Peyotí?"

"For heaven's sake lay off that, Mist' Sam..." The man's arm swung up to guard before his eyes and he shivered as though with an ague. "I ain't slept a wink since I came back. I'd never get sleep if it wasn't for..." for... you know what?"

"He tugged a red-and-green cigarette packet from his pocket. Dustin snatched it from him, tore out four cigarettes and gave them to him, and thrust the package into his desk drawer.

"You damned fool. I've told you a dozen times not to get any of these things except what I give you. I give you your full allowance. Just suppose you take too many of these and talk too much. You know what'll happen. You'll be hung as high as Haman."

Peyotí looked dazed. He had looked for a coin and perhaps an errand and he found a threat that he only half understood. He could not guess what was coming, but he knew that he was on the verge of being violently ill. His stomach was queasy. Man, born of woman, cannot smoke unlimited peyotí cigarettes to kill the memory of a murder that he never committed and still carry himself like a free man. Peyotí squirmed and Dustin gladly noted it.

"I wish I could help you, Peyotí," he said. "But I don't see how I can."

"What's the matter, boss? What's come up?"

"You know damned well what you did. The question is how're you goin' to keep the word from knowin' what you did, too? I'll hate to see you at the end of a rope, Peyotí. You remember Willis?"

Peyotí gulped audibly and sat down. He remembered Willis very well. Caught while in the very act of changing brands on two horses of the Cross Keys stock, Willis had been given two hours to confess his sins. The time had been wholly insufficient and Willis had gone to some questionable place with a larrikin about his neck. Peyotí remembered seeing the long body swinging in the wind under a giant live oak while a yellow-hammer and two woodpeckers hammered cheerfully above him. He had never forgotten it and Dustin knew it.

"You see, Peyotí, it's this way. When you killed old man Kane, we thought he was just an old desert rat who had no friends. It seems we were wrong. He had some friends back East. He had a nephew. His name is Gerald Keene or Keene or something like that. Anyhow old man Kane must have written him that he had found a gold mine. This nephew telegraphed that he will be out here to-morrow night to look up his uncle. You know what that means. Every one knows that I've been grub-stakin' old man Kane. They'll come to me first of all. If they ask me any questions, Peyotí, you can see that I've got to tell 'em the truth. I'm willin' to help you all I can, Peyotí, but not to the extent of peyotí. Of course I know under about how it was..." You smoked that damned stuff that I've told you to leave alone. You had a bad dream and you got into a doped row with old man Kane and killed him."

Peyotí shuddered. "Mexico ain't so far away," he muttered.

"That'd get you there. They extradite for murder in Mexico. I guess you've got to pay the bill, Peyotí..." If this man Gerald Kane turns up..."

He had suggested the answer even to a drug-deadened brain.

(To Be Continued)

Two Most Outstanding

Competition in London Names Roosevelt Aid Mame Curie
An American, President Roosevelt, and a French woman, Madame Curie, were chosen by the British public as the outstanding man and woman of 1934 in a competition conducted by a London newspaper.

By a coincidence, both Mme. Curie and Marie Desaler, who was in second place in the women's list, died during the year. In second place among the men was Jan Smuts, former prime minister of South Africa and rector of St. Andrews University, Scotland.

Grapes From South Africa

Pest-Eliminating Treatment Removes Bar To U.S. Market

Grapes from South Africa will be on the United States market for the first time, thanks to a new pest-eliminating treatment and to a regulation of the United States department of agriculture permitting fruit so treated to enter. The new treatment consists in exposing the packed grapes to high temperature for a brief period. This eliminates any flies that may be present but does not damage the grapes. From Science.

Long hair was worn by Buffalo Bill and the old Indian fighters as a matter of honor. They believed that their Indian captors was entitled to a respectable scalplock if he captured them.

Winds Kind To Pilot

Enable Canadian Airways Aviator To Make Flight Record
The gods that control tail winds, it seems, are keeping their eyes on Capt. Walter Gilbert, chief pilot for the Mackenzie river division of Canadian Airways, Ltd., and seeing that they are in his favor.

He flew north from McMurray and had a tail wind all the way. He started back on the day following his arrival at Akilavik, and again found the winds in the right direction. This time, however, it was roaring along at 85 miles an hour, sending long streamers of snow off the hills.

With the aid of the tail wind, he made a flying time record of a little over eight hours from Akilavik to McMurray. On one stretch of 208 miles from Arctic Red River to Fort Good Hope, he was in the air for just an hour and five minutes in an aeroplane which has a cruising speed of 115 miles an hour.

McMurray Tar Sands

Denver Firm To Erect Separating Plant In Alberta

Hon. Thomas G. Murphy, minister of the interior, revealed that the government had given permission to Denver, Colo., financial interests to erect in Alberta plants for separating bitumen from McMurray sands and for refining the bitumen to obtain gasoline, fuel oil and asphalt products.

The permission, Mr. Murphy said, was an extension of a former agreement made with the Denver interests represented by Max Bell which had conducted a "pilot" plant in Toronto for preliminary experiments.

The minister added he understood the firm had proceeded with construction in Alberta of a separation plant as soon as weather conditions permitted work and that the separation plant would be followed by a refinery. All the works, he believed, would cost about \$250,000.

Mr. Murphy said the government will not spend any money on the scheme but that the company will be required to pay royalties for the privileges of working the sands.

THE RHYMING OPTIMIST
By Aline Michaelis

CLOSE AKIN
I have never met Joy
Walking down the street;
But I'd know the movements
Of his dancing feet.
She would come as you do,
Lightly as a cloud,
Shed her slip like sunbeams
Through the waving crowd.

I have never heard Joy
Calling in my ear;
But I know her voice must
Ring like your voice, dear,
Yet I know you share her
Deeper, far, than mine,
Sweeter than the sweetest
Music made on Earth!

Joy may be a pagan,
Joy may be a sprite,
Yet I know you share her
Infinite delight.
Since the day you came to
Dwell in my life,
I have known that Joy and
You are close akin!

Race Of Pygmies
Discovery in India Of Fossil Remains Of Diminutive Human Being

Discovery of fossil remains, apparently those of a human being but 15 inches tall, and a diminutive cow only three inches taller, led to the belief that perhaps a race of pygmies once dwelt in India.

Should the find be authenticated, it was considered likely the discovery would have some effect on the current theories regarding the early dwelling place of the human race.

The remains excavated include those of a pygmy man 15 inches tall, a cow 15 inches tall and a walking stick 10 inches long.

Investigators expressed the opinion a new field had been opened for study of a long extinct race of small men, much more diminutive than the Obongo, Akka and Batwa tribes of pygmies in central Africa. They measure between four and five feet.

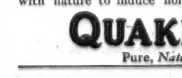

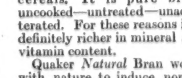

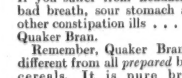

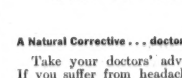

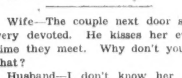

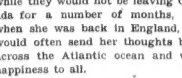

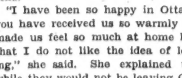

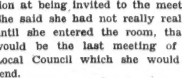

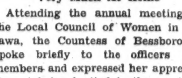

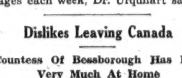

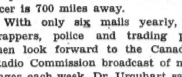

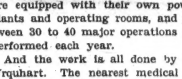

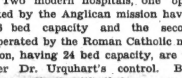

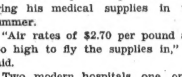

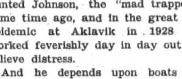

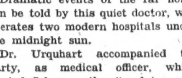

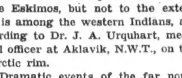

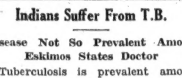

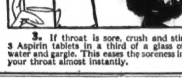

Mother's Pensions
British Columbia To Increase Allowance By A Small Amount

Recipients of mothers' pensions will have their allowances increased by a small amount, it was stated in the British Columbia legislature by Mrs. Paul Smith (Lib. Vancouver-Burrard). It will be the first step in an upward scale and will be put into effect during the next six months, she said. The government had also decided that mothers with only one child should be eligible for pensions. Although the act provided for such eligibility the practice for years had been to exclude them from benefits.

Flashlight batteries can now be made strong enough for a mile-range light.

Bullet-proof inner tubes for automobile tires can be made of sponge rubber.

TRY FASTER WAY TO RELIEVE A COLD

Discovery Bringing Almost Instant Relief to Millions

Follow Simple Directions:
When you have a cold, remember the simple treatment pictured here... prescribed by doctors as the quick, safe way.

Results are amazing. Ache and distress go immediately. Because of Aspirin's quick-disintegrating property, Aspirin "takes hold"—almost instantly. Your cold is relieved "quick as you caught it!"

All you do is take Aspirin and drink plenty of water. Do this every 2 to 4 hours the first day—less often afterward... If throat is sore, the Aspirin gargle will ease it in as little as 2 minutes.

Ask your doctor about this. And be sure you get ASPIRIN when you buy. It is made in Canada and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

Little Helps For This Week

"I have learned in whatsoever state I am therewith to be content."—Philippians 4:2.

No longer forward or behind I look in hope or fear. But grateful, take the good I find. The best of now and here.

—J. G. Whittier.

If we wish to gain contentment we must try such rules as these:

Allow thyself to complain of nothing, not even the weather.

Never picture thyself to thyself under any circumstances in which thou art not.

Never compare thine own lot with that of another.

Never dwell on the morrow. Remember it is God's, not thine.

The heaviest part of sorrow is often to look forward to it. "The Lord will provide."

Never allow thyself to dwell on the wish that things were otherwise than they were. God Almighty loves thee better and more wisely than thou dost thyself.

Would Have Cheque Framed

Alberta Farmer Receives Nineteen Cents In Payment For Cow

One farmer in Alberta has an idea of how to teach his children what hard times mean. He is a neighbor of C. C. Coote, United Farmer member for Macked, Mr. Coote told about him in the House of Commons.

The farmer sent a cow to the Calgary market and after paying all charges was told his net return would be 19 cents. The agent who sold the cow received 76 cents commission. The charge for the hay the cow ate at the market was 35 cents. He was asked to call in for his money as the amount was too small to pay by cheque but the farmer wanted a cheque.

He said he proposed to have it framed so if at some time in the future his son complained of poor prices he could show him what really low prices were.

An Unusual Accident

A strange accident occurred when a motorist approaching a bridge near Pershore, Worcestershire, was held up by two stationary motorcyclists. Their machines stood close together in the road. They leaned towards each other, their heads touching. When the motorist alighted to complain, he found both unconscious. They had collided and their machines had interlocked. They were taken to hospital with bad injuries.

The Berlin fire department is now equipped with portable searchlights, strapped to the bodies of the firemen. The lights have a range of 100 feet.

WEDDING AT RIMBEY

A quiet wedding ceremony performed by the Reverend R. B. Layton, in the manse of the United Church, Lacombe, on March 18th, uniting two of Rimbey's popular young people, Miss Hester Elisabeth MacMillan and Mr. Thomas Marshall, in marriage. Miss Edith Andrews and Mr. Ernest Marshall, brother of the groom were the witnesses.

The bride who is a cousin of Mr. W. A. Cotton of Rimbey, came here from her home in Waskada, Manitoba about two years ago. Since that time she has endeared herself to all of her acquaintances and has become a popular and active member of the various societies of the younger set.

The groom who has grown from childhood in this district is the youngest son of Mr. and Mrs. Joseph Marshall who were among the very earliest settlers in Rimbey. The family has been especially prominent in the development of the Blindman Valley.

The young couple are receiving the best wishes of the community for a happy and prosperous married life. They will reside in the Rimbey district.

LIGHT AND POWER POSSIBLE

Mr. Clifford Danner supervisor of District No. 25 for the Calgary Power Company, was in Rimbey on Tuesday, March 18th, looking over matters relative to the possible extension of the Company's lines and service into the Rimbey district. Mr. Danner's visit to Rimbey was consequent to the report made to the Company by its engineers, Mr. C. C. Planché and Mr. H. B. Bourveau who inspected the town on March 12th. Messrs. Planché and Bourveau met with the Rimbey village council and other ratepayers on Monday, March 11th, for the purpose of discussing ways and means of electrical service for Rimbey and Bentley, and at an informal gathering of Rimbey residents on March 12th the engineers discussed at length the possibility of entering the district via the Air Post situated 7 miles west of Ponoka. The Bentley route however seems to be the logical entry.

TAKING SEED AND FEED APPLICATIONS

Mr. Carl DeMers of the department of agriculture was in Rimbey on Wednesday and Thursday of last week taking applications for feed and seed from the farmers of the district. The applications are made under the feed and seed grain Act.

SOCIAL CREDIT MASS MEET HAS CAPACITY CROWD

A capacity crowd greeted Clive Wilnot last night at the United Church Hall, the occasion being a mass meeting of Social Creditors from all over Central Alberta. The address by Mr. Wilnot was exceedingly interesting and he put forth the principles of Social Credit in a clear and concise manner. The huge crowd in attendance were very enthusiastic and Mr. Wilnot's witty address received rounds of applause.

SOLDIER SETTLERS MEET

The annual meeting of the Lacombe branch of the Soldier Settlers Union was held in the Town Hall, Lacombe, Saturday, March 2nd. The district was very well represented.

The delegates to the Provincial Conference in Edmonton and the returned men's section of the U.F.A. Convention gave comprehensive reports on these gatherings.

The Officers elected were: President, J. S. Ross; Vice-President, H. E. Heath; Sec., J. J. W. Barker. D. Spink, J. Lundie, W. Hazlett, were elected to the Executive.

It was decided to hold a meeting on April 6th, in the Town Hall, Lacombe, to which members are urged to bring their wives with a view to forming a Ladies' Auxiliary of the Local S.S.U.

ST. ANDREW'S UNITED CHURCH

Rev. R. B. Layton, Minister Services at 11 a.m. and 7:30 p.m. The Forty-Third Anniversary of the beginning of Church work in Lacombe will be observed on Sunday, March 31st, in the United Church. Rev. Hugh A. McLeod, M.A., B.D., of Robertson Church, Edmonton, will be the special speaker. Mr. McLeod is one of the outstanding preachers in Alberta. He will give an illustrated lecture on the Passion Play, which he saw last summer in the Church on Monday evening at eight o'clock. The admission will be reasonable.

St. Andrew's Ladies' Guild meets on Wednesday at the home of Mrs. P. E. McLeod.

"I WON'T PAY INTEREST"

OTTAWA, March 27—Mayor Gerry McGeer of Vancouver warned members of the House of Commons tonight he would organize riots and throw into the city by bandwagons in default.

Seventy mayors from all parts of Canada appeared before the members of the House to emphasize their claim that time had come for the Dominion to take over direct relief costs. The alternative, the said, was bankruptcy of the cities and towns of Canada.

Mayor McGeer stole the show with attacks on the financial system of Canada, the banks and bond holders who expected their power of flesh. He claimed Vancouver did not want to default but could not pay all interest charges.

Every Canadian municipality, Mayor McGeer said, was facing the alternative of reducing social charges

or defaulting interest. "I won't pay interest in Vancouver at the expense of any child or woman," he declared.

Riots would follow if relief was discontinued, the Pacific Coast mayor warned members of the House. Vancouver has been threatened with a sheriff being placed in charge if its bonds were defaulted. "You will have riots from that, too," he warned. "If any sheriff comes into my city, I will organize the riot and lead it to throw him (the sheriff) into the bay."

RIMBEY NEWS

Mr. and Mrs. Don Frisken and their small daughter, Donna Fay, left on Monday for their future home in the New Norway district. Mrs. Frisken has been an active and popular member of the social and church circles in Rimby and Mr. Frisken has been the efficient pianist in "Rudy" Platt's orchestra. Their going will be a decided loss to Rimby.

More than twenty of the many friends of Mr. and Mrs. W. E. Cumber and very pleasantly surprised them on the evening of Monday, March 18th with a party in honor of Mr. Cumber's 73rd birthday anniversary.

The whist drive sponsored by the Leedale W.I. in the Leedale Hall on last Saturday night was a decided success. The ladies' prize for high score in cards went to Mrs. Frank Hancher, and the gentleman's prize to Mr. A. R. Hancher. Several special prizes were awarded.

An interesting meeting of the Rimby Social Credit study club was held on the evening of March 20th. Several new members joined up and Mr. Archie McLeod read an article on Social Credit, written by the Reverend P. H. Harbeck, of Castor. In the absence of the president and Secretary of the club, Mr. C. C. Letroy acted as chairman and Mr. Gunn was secretary pro tem.

Miss Jennie Cook of the Rimby public school staff was guest of honor at a surprise party held at the home of Mr. and Mrs. O. Massing on Thursday, March 14th, by the members of the Y.P.S. of the United Church. The society presented Miss Cook with a set of silver tea spoons.

Mr. Stanton Morris of the Bank of Montreal staff here is enjoying a week-end visit from his father, Mr. S. W. Morris of Medicine Hat. Friends of Mr. Morris Jr., are regretting his approaching transfer to the bank staff at Winnipeg. He will be succeeded in Rimby by Mr. W. H. Munro, formerly of Delburne. A farewell party was held at the Dr. S. J. Byers home on Thursday evening in honor of Mr. Morris.

More than 11000 frozen rabbit carcasses have been purchased by Mr. L. P. Robertson of this district at a price of 2c each and were shipped on Monday to Eastern fox farms. Word has been received in Rimby from Forestburg, Alta., announcing the birth, on March 19th, of a son to Mr. and Mrs. Elmer Tiffin. Mr. and Mrs. Tiffin were residents of Rimby for several years while Mr. Tiffin was employed in the Rolston General Store here.

PATHFINDING

Established in 1817, the Bank of Montreal was the first permanent bank in British North America.

Introducing branch banking in Canada, it was the first bank in the capital of Lower Canada, first in the capital of Upper Canada, and first of the present banks in Bytown, afterwards Ottawa, the capital of the Dominion. It was the first permanent bank to be established west of the Great Lakes and the first to achieve a transcontinental system of branches. It was also

The first institution to provide Canada with a domestic currency, both bills and coins.

The first bank to assist in financing the foreign trade of Canada.

The first banker for the Government of Canada.

The first bank to help finance the improvement of the St. Lawrence Waterway, through the assistance it gave to the building of the first Lachine Canal.

From its inception the Bank of Montreal has held the confidence of the Canadian people. Today that confidence is expressed in the fact that the Bank holds more than one million deposit accounts, equal to a deposit account for one in every ten persons in the entire Dominion.

Canadians naturally expect, as the sequel to such a record, that this Bank will retain the spirit of the pioneer in co-operating with the future business life of the nation.

The Brighter Side

For the past five years the people of Canada in common with those of other countries have been looking at the dark side of things, and during these years the picture at which they have been looking has become progressively darker and more gloomy. In fact, following the stock market crash in the late months of 1929, people generally did not seek to find any rays of light, they became more and more fearful, and preferred to dwell upon every unfavorable factor in the situation and to close their eyes and refuse to see anything that could be regarded as hopeful.

This state of mind spread throughout the whole country, and, unfortunately for Western Canada, it was accentuated by reason of the advent of a cycle of abnormally dry years, accompanied by other climatic conditions, with their aftermath of pests and other drawbacks entirely beyond the control of man, and all discouraging and destructive of confidence on the part of people so grievously afflicted.

Under the circumstances the amazing thing is that people, taken on the whole, have displayed such wonderful fortitude, so much courage and such fine patience.

Within recent months the clouds of depression have been thinning, conditions have been slowly improving, and the time has come when, we think, the people of Canada may well, to their own advantage and further encouragement, take a look at some of the brighter things in our national life for which they have deep reason for thankfulness in comparison with the lot of other peoples and nations.

Unlike quite a few nations, Canada has maintained its national honor, has not repudiated but has met its national obligations. As a result, Canada stands higher than ever in the estimation of the world. It is a great asset that has not decreased in value but has been substantially increased, and that increased value will stand this Dominion in good stead in the years that lie ahead.

The general business situation in Canada is improving. In view of the economic depths to which the whole world had sunk, this improvement will naturally be slow at first, but it is gathering momentum and volume. The trade of Canada, both import and export, and internal as well, is increasing; the volume of business is becoming larger; railway revenues are rising; national revenues are substantially larger and are increasing, all of which means more employment in the not distant future, and especially so if action is taken to remove or materially lessen the many restrictions now imposed on trade.

Another bright side to the Canadian picture is to be found in the fact that, despite all the difficulties and problems, worries and sufferings of people, Canada has been remarkably free of riots and other forms of defiance of the law which have characterized other lands and resulted in open strife and bloodshed. The Canadian people have kept their heads, and as a result they are winning through, just as the people of Britain are winning through.

Considering the past, the present and the future, there is another and very large and important spot of brightness, leading to hope and confidence for the future, in the fact that almost alone among the nations of the world Canada has been free and is free of the one great burden which rests with crushing force upon the shoulders of most nations. That is the burden of armaments, the enormous cost of warlike preparations. While other nations are paying annual tribute reckoned in hundreds of millions, even billions of dollars, to the great war god Mars, the Canadian people are not called upon to do so.

A couple of small destroyers, one on either seacoast, and a handful of militia which is merely a reserve to the established police forces of the country to assist in and when necessary in the maintenance of peace within our own borders, but in no sense an army maintained for offense against any nation—that is all. With no great battleships, no standing army, no great line of fortifications, Canada lives at peace with the world, the friend of every nation, having no quarrel with any.

If this picture were otherwise, if the Canadian people were taxed to the limit, as other peoples are, to provide the god of war with the machinery and equipment of wholesale human destruction, then Canada might have cause to fear for the future. Fortunately, that fear does not exist.

Given a return to more normal and therefore favorable climatic conditions throughout Western Canada, with a removal of the artificial restrictions imposed upon the commercial transactions and business life of the country,—both of which conditions are not only possible but probable and ones we have every reason to expect,—and free from the entanglements of war-affrighted nations, the Canadian people without any undue optimism may well turn their eyes away from the darker picture of the past five years, and find renewed confidence and happiness in the brighter, better days now dawning.

Peace Garden

Beautification of the International Peace Garden on the Manitoba-North Dakota boundary has been undertaken by the Federated Women's Institutes of Canada, the Canadian Horticultural Council was told by Henry J. Moore, of Islington, Ont.

The ancients called the planet Venus "Hesperus" when it was an evening star, and "Phosphorus" when they saw it was a morning star, not knowing it was the same body.

Grows Large Apples

Eight-pound apples have been grown by Mr. Lobbato Metadua, of Nagane, Japan. Although sour, they have a good flavor. Their size is the result of many experiments. Now they are to be grown for sale.

One of the strangest businesses in London is the human skeleton business of G. Rouilly, who imports skeletons from Germany, Austria, Italy and Russia, and sells or hires them to medical students.

Magic Of Science

Electric Lung Restores Speech To Persons Without Voice
An electric "lung" and a pair of magnetic hand cuffs, both new, have come out of the scientific magic box of the Bell laboratories.

They were shown at a meeting of the University of Michigan Club of New York by Dr. Sergius P. Grace, vice-president of the laboratories. The lung substitutes electric current for air to make vocal sounds in the artificial larynx, which the laboratories invented to restore speech to about 1,000 persons in the United States who have lost their vocal cords.

The new instrument is placed in the mouth, much like a pipe. It pours into the mouth a pure tone which becomes intelligible speech merely by movement of mouth, lips and tongue in ordinary conversational manner. The voiceless person uses a pocket battery little bigger than a deck of cards. He pushes a "pipe" in his mouth. He presses a button and the sound continues as long as he holds this switch closed.

The magnetic hand cuffs demonstrate the super-magnetic power of a new alloy which possesses 20 times the attraction of pure iron. With a cuff on each wrist, or held on each hand, the chain between is joined by placing together two flat pieces of the new metal.

The most powerful man cannot pull these plates apart.

Alfalfa Seed Supply

Supply For Seed Smaller Now Than Anticipated

The alfalfa seed supply in Canada is now regarded as no more than sufficient for seed requirements this coming spring, being somewhat smaller than was formerly expected. In Ontario, the chief alfalfa seed producing province in Canada, the 1934 seed crop is slightly below normal. Much of the seed was lacking in plumpness and weight owing to insufficient rainfall during the filling season. This was true particularly of seed saved from the second cutting.

It is fortunate, however, that the supply of Canadian grown alfalfa seed for this spring is sufficient to sow a normal acreage. Alfalfa is becoming more and more popular as a farm crop and has saved the hay situation on many farms where drought would have caused a serious hay shortage if other clovers and grasses had been the only hay crops. Until quite recent years the only areas in Ontario where it was grown extensively were a few of the south-western counties. It is now common throughout the province and it only hardy seed is used it may be counted upon to thrive in almost any cultivable area in Canada where the soil has sufficient lime content and where good drainage is also provided.

Most of the alfalfa now grown in Canada is either of the Ontario Variegated or Crimson variety, the two outstanding hardy varieties which have made alfalfa production in Canada both extensive and profitable. A paying industry.

Prosperity Of India Helped By Money Nut Production

The money nut is important. It yields oil for margarine and salads; winter feed for cattle, and it has appreciably contributed to the prosperity of India.

The Imperial Economic Committee has been investigating the problems of the money nut alias the ground nut (its official name) and the peanut of American crops.

India alone produces money nuts worth about \$130,000,000 a year, comes next The United States, although another important producer, is so fond of peanuts that it ranks as an importing country.

West Africa, Tanganyika, South Africa, and Australia are also producers.

The world's consumption has more than doubled since the war. The Empire's share of production has increased from 60 per cent. to 70 per cent. in 1929.

Yet all is not well with the money nut industry. "The use of the oil as a salad oil has steadily increased," the report states, "but the demand in its other principal uses—for cooking, margarine and soap—has declined."

Stolen Book Returned

Rare Edition Of Shakespeare Was Missing Two Years

A third edition of Shakespeare, valued at \$10,000, missing for two years, was returned to its owner by Police Commissioner Valentine, who received the volume in the mail.

The book which was printed in 1663 was stolen from the Brick Row Bookshop, 42 East Fifth street, New York, in 1932 by a man who spent several hours looking at collections of Shakespeare. It once had been part of the "million dollar library" of Jerome Kern, song writer.

Police had received word that a "gang" had the book and was unable to dispose of it. They were unable to trace it.

Commissioner Valentine's secretary opened a plainly wrapped package which had been mailed uninsured and found the book. There was no return address.

England is one of the greatest horse racing nations in the world with tracks all over the country.

Township That Is Unique

Adamsfield, Australia, Isolated Although Only 34 Miles From Railroad

There has been discovered to the world a township in Tasmania, Australia, which is unique, at any rate, in the southern hemisphere.

It has no hotel, there is no church, no weddings have been held there, there is no clergyman, and the town is under the control of a vigilance committee.

The township is that of Adamsfield, less than 70 miles as the crow flies from Hobart, and only 24 miles from a railroad. From the railroad, however, the only means of communication is by horse.

Some of the residents have not "been out end"—that is, made the journey out to civilization—for years, and it is possible for the stray visitor who finds his way to the town in the year in which the womenfolk last did so, by the fashions they are following.

The vigilance committee is a real power and has come into being because of the rare visits of a policeman on a tour of inspection. The committee finds it the main task of public opinion is the most effective weapon it wields.

Recently an area of agricultural land was taken up 15 miles "in" from Adamsfield, and every item of supplies had to be taken in on men's shoulders.

Architectural Toy

Proceeds Of World Tour Of Doll House To Be Donated To Hospitals For Sick Children

Colleen Moore's doll house—a 14-foot fairy castle with 11 rooms—will arrive in New York April 1 for its world premiere.

The architectural toy, built at a cost of \$48,000, will be taken on a world tour and the proceeds from exhibitions will be donated to hospitals for crippled children.

Built in scale of an inch to the foot, the doll's house contains these marvels:

A gothic cathedral organ, 15 inches high, which plays music.

A feather nightingale operated by electricity.

Light bulbs the size of wheat grains.

A robot fairy princess who sings, answers questions and dances in a garden grove.

A bible the size of a baby's thumb nail.

Colleen Moore said the doll's house was one of her childhood dreams.

Nationalistic Policy

Sir Josiah Stamp Believes U.S. Policy Does Not Fit Needs

Sir Josiah Stamp, famed economist, in a speech before the American Chamber of Commerce said the United States "in pursuing a highly centralized nationalistic policy which is ill-suited to the needs of the knitted world trade improvement."

"The NRA codes," he said, "have not paid very great attention to international factors and the uncertain condition in America has been brought about by codes. The piecemeal treatment of the problem, nation by nation, is wrong. It is unnatural for trade to be balanced between two nations. It is more important that trade with all countries be treated as a whole."

Sir Josiah stressed the importance of currency stabilization and said "if it was known the United States were going to devalue another 10 per cent., it would help matters greatly."

Starvation The Cure

When People Do Not Have Money To Buy Food, Then Health Is Improved

In days of depression, general health is better than in days of opulence and life living, several doctors told the House of Commons during a health debate. Dr. J. P. Howden (Lab., St. Boniface) said "starvation is the cure for many diseases" and it was because people did not have the money to buy rich foods that their health improved. And it was true, Dr. Howden added, that "many people dig their graves with their teeth."

Camel May Be Displaced

And now the motor car may displace the camel. By use of 15-ton transport units, recently tested over 10,000 miles in northern Australia, it appears adequate and cheap service can be provided in undeveloped areas combined with economical road construction. The unit reduced the rates to the level of those charged for hauling by camel teams.

Girl—"Mother, what does this proverb mean—'Friends agree best apart'?"

Mother—"It means, lassie, that the less we see o' your father's folk the better."

An English boy swallowed a safety razor blade. But every household is not equipped with boys to get rid of the pesky things.

Football is a popular game with Eskimo children, particularly little girls, and the ball is made of seal skin stuffed with hair.

Little Journeys In Science

ACETYLENE

(By Gordon H. Guest, M.A.)

Acetylene is a colorless gas produced by the action of water on carbide. It is prepared in large quantities for use as an illuminant and as a source of great heat. When heated it decomposes into hydrogen and carbon. It was by this method that the Germans prepared much of the hydrogen used for filling the Zeppelins in the World War.

When compressed in cylinders, acetylene is very explosive, since the heat produced in compressing the gas is sufficient to start decomposition. However, scientists have found that acetylene can be compressed with safety by forcing it at low temperatures into steel cylinders completely filled with some porous material which has been soaked in a liquid called acetone. The gas is very soluble in this liquid and under such conditions it is not explosive.

The chief use of acetylene is in the cutting and welding of metals. For this work the gas is burned in pure oxygen in an apparatus known as the oxyacetylene blowpipe. A temperature of about 4,800 degrees Fahrenheit may be obtained in this way. In taking iron structures apart the tip of the flame is held in contact with some part of the metal, until the metal is heated to a high temperature, then more oxygen is turned on and the hot metal at once commences to burn away. By moving the tip of the flame containing the excess of oxygen over the metal, the metal is cut into pieces.

Recently Langmuir, an American scientist, has invented a device known as the hydrogen-arc welding torch by means of which very high temperatures can be obtained. In this type of blowpipe a stream of hydrogen is conducted from a small tube through a series of electrodes. A temperature of at least 10,000 degrees Fahrenheit may be reached with this new torch.

GARDENING

Gordon L. Smith

Planting Nursery Stock

The proper time to plant perennials, shrubs, fruit trees, shrubbery and other kinds of nursery stock is just as soon as the ground can be worked. But of course they must be purchased when the prices are in prices and quality. Only shrubs and trees that are in good condition should be purchased. That good stock has been purchased, the next thing is to get it planted as quickly as possible and with absolutely no exposure to the open air. If the ground is still until to plant, open the parcel, soak in water, and plant in a shallow trench, covering the roots and most of the stems with earth firmly packed down. Leave here until permanent locations are ready.

Spring Pruning

Most pruning is done in late winter or early spring. It is not a difficult task, though a little is usually essential with all sorts of shrubs, roses and both fruit and ornamental trees. The pruning should be removed, though at this time of year it may be difficult to detect dying from live wood. The general idea is to let light, encourage strong growth and also turn out a tree or shrub which is fairly symmetrical. With shrubbery the pruning of those things that bloom late in the year, should be done early in the spring, but shrubs that bloom early, should be pruned in late spring, they will bleed profusely. The work must be carried out in the spring, as necessary with grape vines. If these are pruned in late spring, they will bleed profusely. The work must be carried out in the spring, as necessary with grape vines. If these are pruned in late spring, they will bleed profusely. The work must be carried out in the spring, as necessary with grape vines.

Raspberries are borne on two-year-old canes only, so that after the crop has been harvested and the new canes well started, all old wood should be removed. Most of the ordinary roses are cut back severely after the crop has been harvested, and best results are obtained from climbing roses where almost all the old wood is removed in late summer after blooming is over. With flowering shrubs, the aim is to keep new growth on by the removal of weak three and four-year-old wood. Young fruit trees after growth starts in the spring, should be pruned, beyond shaping slightly, but after they have started to bear fruit, considerable growth should be removed each spring, so that the light and air are distributed evenly through the whole tree.

Canadian Percheron Association

Nine Directors Are Elected At Meeting In Brandon

The nine directors of the Canadian Percheron Association, elected by ballot, were announced at Brandon by A. M. MacPherson, secretary of the association. The elected directors are: J. A. Thorne of St. Anne de Belleville, Que.; Charles M. McCallum, Brantford, Ont.; M. W. Connel, Keweenaw, Ont.; James Ramsey, Portage la Prairie, Man.; Carl Roberts, St. Adolphe, Man.; Hardy E. Salter, Calgary; W. A. Greenway, Acme, Alta.; J. B. Ross, Govan, Sask., and L. A. Douglass, St. Mary, Sask.

The next annual meeting of the association is to be held in Toronto.

Wants Tariff On Ice Cream

The Bermuda Board of Agriculture has recommended protective duties on ice cream and the raw materials thereof. The assembly referred the matter to its finance committee for investigation. The local dairy industry suffered, it was pointed out, because during 1933 there were 512 gallons of milk and cream imported from Canada, and 22,667 gallons from the United States.

In six years Morocco has had 1,630,000 people added to its population total.

Rolling down to Ogden's

To make the fragrant, friendly cigarette tobacco that gives a most scientific blend of flavor, Ogden's has his own. Only the best leaves can pass the Ogden's test for mildness and smoothness and easy rolling. That's why Ogden's Fine Cut is such a favorite. Roll your own with Ogden's and you'll find it rolls them easier and rolls them better, especially when you choose the finest cigarette papers, "Chantrelle" or "Vogue".

Midnight Gold Rush

Discovery Of Free Gold At Lake Athabasca Causes Excitement

Discovery of free gold in the Beaverfoot field on Lake Athabasca, has led to wild excitement in the area, says a special radio dispatch from Fort Chipewyan to the Edmonton Journal. Word of the discovery caused a wild midnight gold rush which left Beaverfoot camp deserted half an hour after word of the find reached it.

The find was made by a St. Joseph's Point trapper, who brought in samples of rich ore, and on his return journey, discovered he was being followed through the darkness by 17 men anxious to stake near his find. The trapper, pretending he was lost, managed to throw his pursuers off the trail, then hurried to stake his claims.

Diamond drill cores from Consolidated Mining and Smelting Company claims at Beaverfoot are reported to have shown rich deposits of gold 30 feet below the surface.

Better Than The Scot

Best Bagpipe Band In Scotland Composed Of Jews

A blow to national pride has been administered in Glasgow by the discovery that one of Scotland's very hottest bagpipe bands is composed exclusively of Jews. Hitherto Scotsmen have proudly boasted that only a true-born Scot could master the rousing strains of the national musical instrument. Now come the news that the "Jewish Lads Brigade" has won the Scottish championship trophy for their skill with the pipes and bellows.

Appland PAPER PRODUCTS

LONDON, ONTARIO

University Of Alberta Develops A New Variety Of Wheat Said To Be Drouth Resistant

An Alberta product developed at the University of Alberta, a new variety of wheat will be given a real test this year when it is planted in field areas in the province's drouth districts of the south.

A cross between the famous Canadian Marquis wheat and Kanred, an equally famed grain in the United States winter wheat belt, the new variety, originated by Dr. O. S. Aamodt, professor of genetics and plant breeding at the University of Alberta, has been named "Canus", a derivation of the two nations—Canada and the United States.

A bearded variety, a heritage from the winter wheat side of its ancestry, the new grain is reported to be drouth resistant and to give a higher yield than Marquis.

In tests conducted by the Dominion department of agriculture and the research council of Canada, "Canus" showed an average yield of 32.4 bushels to the acre.

Here are some of the attributes of the newly-developed wheat: Resistance to drouth, foot rot and bunt, two wheat diseases which have taken heavy toll in the west. Good stiffness and baking qualities. Dr. Aamodt's wheat has one disadvantage. It is not resistant to rust, but this is not a serious problem in this province as rust is seldom a menace to Alberta producers.

A report, issued to its members by the Alberta wheat pool, says:

"The probability is that Canus will ultimately supplant Marquis over a considerable area of the plains region of western Canada. It will not invade areas where early ripening is required as it takes about the same time to reach maturity as does Marquis."

Ten bushels of the newly-developed Canus wheat will be distributed among farmers of central and southern Alberta this year, according to Dr. O. S. Aamodt, University of Alberta, originator of "Canus". It will be the first time the wheat, on which Dr. Aamodt has worked 15 years has been given to farmers for seed.

Dr. Aamodt does not claim remarkable drouth-resisting strength for his new grain. It is mainly useful in its strength against rust and foot rot, he declares. The national research council, Ottawa, financed his experiments.

Another high grade wheat, said to be equal in quality to Reward and with possibly greater yield and having strong drouth resistance, is in the process of development. Dr. Aamodt and may be available in five years.

Odorless Cabbage

Cornell University Professor Develops A New Type

An odorless cabbage, something new in the vegetable world, was announced at Cornell University.

It took 4,000 cabbages and six years to produce it. Each year Professor C. H. Myers uprooted a few of the most sturdy early Savoy cabbages in the Cornell experimental gardens and placed them in cold storage for about two months. This gave the young cabbages a "rest." Then he replanted the cabbages in greenhouses.

There was an expert substituted steel tweezers for bees, butterflies and other underminding pollen spreaders. He took pollen from the anther of one cabbage flower and placed it on the pistil of another.

Cathedral Has Ship's Bell

Also Two Other Gifts From British Warship Canterbury

When the British warship Canterbury was broken up some months ago the ship's bell was placed in Canterbury Cathedral. Two interesting seafaring gifts have now been added to it. One is a log-book, presented by Admiral Percy Royde. In this every seafarer records his service and rank and signs his name when he first strikes six bells in the cathedral. Each morning a seafarer "stands by" to strike six bells at 11 o'clock. The other gift is a model of the first H.M.S. Canterbury, built in 1744. This is placed above the ship's bell. It is presented in memory of the ship's last commander who commanded the last ship of that name until his death in 1928.

Queer Names For Streets

Paris Lays Claim To Having Most Of Any City

Paris claims to have the queerest named streets than any other city in the world. They include "Ash Trays Street," "The Street of the Bad Boys," "Good Children Street," "Fishing Cat Street," "Green Dog Street," and "White Peacock Street." Other streets are "Men-in-Law," "Hot Cat," "Lovely Leaves," "Windy Wood," "Red Ball," "Big Bottle" and "Little Mug." Besides queerly named streets Paris has "English" streets. They include those bearing the names of King George V., Queen Victoria, Charles Dickens, Lord Byron, Isaac Newton and Captain Scott.

Planned By Julius Caesar

Giant Aqueduct Is Now Nearing Completion In Italy

Italy's giant new Apulian Aqueduct, which will supply 302 towns and villages with water, is nearing completion after 20 years of work.

The main conduit will be one of the largest water conveyers in the world, and its length, with branches, will total 920 miles. Already 103 towns and villages are receiving supplies.

Each of the 2,500,000 inhabitants served by the aqueduct will have an average supply of 15 gallons a day. These people have hitherto had to rely on rainfall for supplies, there being a total absence of underground springs.

Signor Mussolini's government is thus completing a work which was first conceived by Julius Caesar, who also attempted the reclamation of the Pontine Marshes, in which two new towns have been built.

The main conduit of the Apulian Aqueduct is 152 miles long, and of this length 67 miles passes through the mountains. The conduit is 155, of which 118 have already been completed and seven are now under construction. There will be 27 pumping stations, of which 23 are completed.

The cost of the aqueduct is estimated at about £11,500,000.

Cancer Research

New Discovery Is Made In Relation To Use Of Radiation

The discovery of a mysterious substance which makes cancer cells more susceptible than healthy one to X-rays and radium rays was reported recently.

Physicians have long known cancer tissue is affected by radiation more than sound flesh but the reason was believed to be that the rays stopped growth of the cells.

Experiments by Dr. Paul S. Henshaw of Memorial Hospital, New York, have apparently determined that the rays halt the workings of the strange substance that regulates not only growth in size but other development as well.

The studies by Dr. Henshaw were made public by the American Association for the Advancement of Science. Cancer specialists hope that from them may grow the knowledge of just how much radiation to apply to the diseased cells so the normal ones will not be harmed.

A Valuable Discovery

Water Has Been Found In At Least Three Different Forms

Water has been found to exist in at least three forms by Doctors R. G. Gustavson and Humphrey G. Owen, of Denver University. This discovery is expected to be of great value to mankind. "Once regarded as one of the simplest and most familiar of substances, water has now been found in at least three different forms made from a new, heavier hydrogen atom than the traditionally accepted type. This discovery has led to still more important discoveries by studying certain properties of the new water and the new hydrogen. It is known that water resulting from melting ice is different from water resulting from condensing steam and that the melted ice type has more value for growing plants than other types. That is why flowers bloom so abundantly at the edge of snowbanks in our mountains."

Brains Are Electrical

Scientists Not Certain Yet What Nerve Impulses Indicate

Brains are electrical, according to the recent discovery of a group of scientists who found that nerve impulses are electric surges and that the largest travel to the brain in direct relation to outside stimuli. Besides these nerve impulses which flow into the brain there are regular surges flowing through the brain itself even in the absence of any stimulus. This was proved by a very delicate apparatus which is capable of amplifying electrical currents 1,000,000 times. When electrodes were attached to the skulls of the subjects the surges were transformed into audible clicks. Scientists have not yet found out what these brain surges indicate, but it is thought that they may be human messages sent by the brain's ability to receive and translate messages sent by the nerves.

Arrangement Renewed

The government has renewed for another 15 months an arrangement under which the Dominion reimburses provincial workmen's compensation boards and employers of war pensioners having disability of 25 per cent. and more when the pensioners have met with industrial accidents. The arrangement covers also imperial veterans resident in Canada.

UNCLE SAM HOLED IN FOR ANOTHER WINTER! —Talburt in the Washington Daily News.

Origins Of Canadian Oats

Leading Varieties All Came From Outside The Dominion

The leading varieties of oats in Canada, unlike Canadian wheat, have all originated outside the Dominion, although certain Canadian varieties are gradually advancing to the premier positions. At the present time the most outstanding varieties of oats grown in Canada are Banner, Alaska, and Gopher, all of which have come from the United States, and Victory which was introduced from Sweden. Among other varieties is Legacy, a new promising originator of the Central Experimental Farm at Ottawa, which has done particularly well in Northern Saskatchewan, Central and Northern Alberta, and in the Eastern Townships of Quebec. Carlier, a production of Macdonald College, Quebec, may eventually replace Alaska in Quebec province as the standard early oat for Eastern Canada, while reports over a period of years show that O.A.C. 72 and O.A.C. 144, from the Ontario Agricultural College, yield well, the former on the lighter soils and the latter on the heavier soils of Southwestern Ontario. Of other varieties, Anthony was introduced into Manitoba from the United States in 1900; Gold Rain, of Swedish origin, does well in Eastern Canada, and White Cross, another from the United States, appears to be best adapted to Northern Alberta conditions.

"Flies" legs are used to manufacture the false eyelashes fashionable with women.

It is asserted that at bridge a good deal depends on the player. And the player on a good deal.

Children, especially those who are high-strung, need a great deal of sleep. Parents should be careful not to confuse nervous exhaustion with laziness in childhood.

Based On Measurements

Explanation Of Why Sun's Rays Hotter In Winter

The sun's rays reaching the earth are hotter in the winter than in the summer. If measurements in both seasons are made at the same altitude of the sun, according to Dr. Bernhard Hurwitz, research associate at the Blue Hill Meteorological Observatory, Harvard University, Cambridge, Mass.

Winter is a cold period, not because the sun's rays are cooler, but because there are so many fewer hours of sunlight in winter than in summer, and because the rays strike the earth at a lower angle on the average.

The fact that the sun's rays are hotter in winter is due to several causes, Dr. Hurwitz found. One is that the earth is nearer the sun at this season. Another is that water vapor is much less, which is important because water vapor absorbs a good deal of solar radiation.

The third factor is that winter air is much clearer than summer air, and that dust in the summer air cuts off more of the sun's heat.

Canada On Parade

Dominion Puts On Expensive Display At British Industries Fair

Visitors to the British Industries Fair which is now in progress at London cannot help but be favourably impressed by the parade of Canadian accomplishments and ability which the Dominion presents. Exhibits of manufactured goods reveal that Canada, besides being a great agricultural country rich in natural resources, has also a wide range of industries.

Canada is being represented at this important event this year by 44 individual Canadian manufacturing firms as well as by the Canadian government which will have an extensive and representative exhibit in the Empire section. In the Canadian section proper at Olympia, the principal manufacturers of the Dominion are displaying a greater variety of commodities, manufactured or produced in Canada, than ever before, typifying to some extent the resourcefulness and ingenuity of Canadian industries. A number of manufactures of Canadian foods will be on exhibit, including breakfast foods, jellies, and honey. Rubber manufactures of all descriptions ranging from automobile tires to toy balloons and erasers; chewing gum candies and other confectionery; liquors, puppy biscuits, beauty preparations, washing machines, cheese, toys, canoes, gloves, reliques, school and office furniture and packing cases are included in the extensive display of what Canadian factories are turning out today.

A. M. CAMPBELL, Ltd. | Lacombe.

W.M.S. MEETING

An enthusiastic report of the Branch conference held last week in Calgary, was given by Mrs. W. C. Sweet at the regular W.M.S. meeting on Tuesday at Mrs. W. Dowling's home. Mrs. Sweet was elected W.M.S. representative on the local Church Missionary Committee. The Society has agreed to be responsible for the morning Church service on Sunday, April 7th, during Mr. Layton's absence in the East. Miss M. Laycock of Ponoka will be the speaker, and she will also address a Thank-offering meeting on Wednesday evening, April 10th in the United Church. The supply allocation of seven pair of mittens and new or old clothing for boys 10 to 14 years of age, was accepted. Devotional period was conducted by Mrs. Geo. Ramsey and Mrs. A. Gilmour the topic being on "Prayer" and God's promise in this connection, and the suggestion offered that all members pray for Peace, for our young people, and for Temperance.

Where You Buy With Confidence

The New Graham Six—

Economy, safety, comfort and performance are big features in the new 1935 Graham Six. Hydraulic Brakes, Timken Bearings, Full Length Water Jacket, Aluminum Cylinder Head, Rubber Mountings and a big built-in Luggage Compartment are just a few of the of the things that make Graham "The Most Imitated Car on the Road."
